Apple Professional Development

Apple believes that technology has the power to transform learning and teaching, and we deliver on that belief. Our professional development offerings help faculty infuse Apple technology into their instructional practices and curricula in a way that makes the technology transparent and the learning more engaging and meaningful.

All Apple Education Trainers are current or former educators, which gives them a personal understanding of learning and teaching with technology. Because they know what's important in the curriculum, they can ensure that the focus of the professional learning they deliver is always relevant and timely. Apple Professional Development K-12 offerings are organized by location and level:

- Leadership:** Offerings assist education leaders in visioning, planning, and implementing a transformative learning environment for faculty and students that leverages Apple products and content.
- Foundations:** Offerings focus on the features of Apple products and apps and developing those into skills that apply to learning and teaching. Foundations courses help faculty become confident and comfortable using Apple products and integrating them into their teaching strategies.
- Integration:** Offerings take foundational skills to the next level of learning through the exploration of content design for engaging learners and through cross-curricular integration of Apple product features and content.
- Support:** Offerings are development sessions for a cohort of educators and are optimally taken directly after completing one of the Foundations or Integration courses. Seminars extend and develop newfound knowledge by mentoring participants in a personal learning project.
- Higher Education:** Offering Drop-In Courses, Apple Academies and Programs, Apple Learning Series.
